

**2009 MY  
Vehicle Line: FLEX  
FAST TURN ORDERS (FTOs)**

In an effort to provide dealers with guidance on ordering, Ford has developed specific ordering recommendations, which statistically represent the fastest turning configurations when this specific content is grouped together (referred to as Fast Turn Orders). The Fast Turn Orders were developed as a result of an extensive analysis of actual retail dealer sales performance of every vehicle configuration with the goal of identifying those configurations with the best DOL performance.

FTOs are designed to provide dealers with:

- Completely configured vehicle orders representing the fastest turning configurations available
- Options to consider adding to FTOs that do not degrade the inventory turn performance.

There are 6 FTOs for the 2009MY Flex, and the FTOs for Flex have been set up similar to a fast food restaurant's "Combo Meal Menu", as there are a number of pre-ordered vehicles that dealers can select directly from:
